TAREK MEDJOUB

Network & Security Engineer | Fortinet SD-WAN | Cisco | Azure & AWS Hybrid Cloud

Paris, France | 07 46 50 36 73 | tarek.medjoub@outlook.fr | linkedin.com/in/tarek-medjoub | tarekmjb.github.io/tmedjoub.github.io

PROFESSIONAL SUMMARY

Network and security engineer with three years of hands-on work on multisite networks. At Condor Electronics I led a team of six and moved our intersite links to Fortinet SD-WAN, which made the sites far more resilient. My day-to-day is Cisco routing and switching (OSPF, BGP, VLANs) and FortiGate security, and I now also connect on-prem networks to Azure and AWS over IPsec and BGP. I hold a Master's in Networks & Telecommunications and an MBA in Project Management, so I can run the project as well as the configs.

TECHNICAL SKILLS

- **Routing & Switching:** Cisco IOS / IOS-XE, OSPF (multi-area), BGP, EIGRP, static routing, PBR, VLAN / 802.1Q, inter-VLAN routing, STP / RSTP / MSTP, EtherChannel / LACP, HSRP / VRRP, BFD, IPv4 / IPv6 subnetting, VLSM
- **Network Security:** Fortinet FortiGate, FortiManager, FortiAnalyzer, firewall policy review, zones and DMZ, IPS profiles, ACLs, network segmentation, device hardening, SNMPv3
- **SD-WAN & VPN:** Fortinet SD-WAN, SLA-based path steering, dual-ISP failover, hub-and-spoke design, IPsec site-to-site VPN (IKEv2, AES-256, route-based VTI), SSL VPN
- **Cloud Networking:** Microsoft Azure (VPN Gateway), AWS (Transit Gateway), Aviatrix, BGP over IPsec, route filtering, hybrid cloud connectivity
- **Monitoring & ITSM:** Zabbix, PRTG, ManageEngine OpManager, GLPI, NOC dashboards, alerting and incident ticketing
- **Automation & Tools:** Ansible, EVE-NG, Wireshark, Windows Server, Linux
- **Vendors:** Cisco, Fortinet, Huawei, Ubiquiti

PROFESSIONAL EXPERIENCE

Network & Security Engineer (Independent Consultant)
Self-employed | *France* | *2026 – Present*

- Audit switching, routing and firewall configurations against best practices and deliver prioritised findings.
- Review FortiGate rule bases, zones, DMZ and IPS profiles to tighten security policy and reduce exposure.
- Assess IPsec and SSL VPN architectures, SD-WAN SLA rules and dual-ISP failover designs.
- Review site-to-cloud VPN connectivity to Azure and AWS, including BGP route propagation, filtering and monitoring.
- Validate proposed designs in EVE-NG and deliver clear technical documentation at the end of each engagement.

Assistant Network & Security Project Manager
SGHP | *France* | *2026*

- Supported the migration of on-premises infrastructure to the cloud.

Team Leader & Network Security Project Lead
Condor Electronics | *Algeria* | *2023 – 2025*

- Led a team of 4 technicians and 2 engineers supporting a multisite industrial network.
- Migrated intersite links to Fortinet SD-WAN with a Ubiquiti backup path, improving resilience between sites.
- Audited VLAN, ACL and OSPF configurations and corrected issues across sites.
- Handled network monitoring alerts in Zabbix and PRTG and managed incidents through GLPI tickets.

Network Engineer Intern
3K Solutions | *Algeria* | *2023*

- Configured Cisco devices: IP addressing, VLANs and static routing.
- Performed connectivity testing and troubleshooting.

KEY PROJECTS

SD-WAN Enterprise Migration (Fortinet, SD-WAN, IPsec, BGP, OSPF)

- Designed a migration of a 4-site enterprise from MPLS and static routes to a hub-and-spoke Fortinet SD-WAN with 2 ISPs per site, IPsec IKEv2 / AES-256 and BGP/OSPF.
- Validated the design in EVE-NG before cutover; reduced failover time in the lab from 3–5 minutes to about 1.5 seconds.

Hybrid Cloud Architecture (FortiGate, Azure, AWS, BGP)

- Connected an on-premises FortiGate to Azure VPN Gateway and AWS Transit Gateway using route-based IPsec and 3 BGP peers, with zero static routes to the cloud.
- Applied strict prefix filtering and centralised monitoring in PRTG.

LAN Architecture Optimisation (VLAN, OSPF, HSRP, ACL)

- Replaced a flat /16 network of 800+ hosts in one broadcast domain with a 3-tier core / distribution / access design using VLAN segmentation, OSPF, HSRP gateways, ACLs and SNMPv3.

Monitoring & Alerting Stack (Zabbix, PRTG, GLPI)

- Built Zabbix SNMPv3 polling with severity-based triggers, automatic GLPI ticket creation and NOC dashboards so every alert becomes a tracked incident.

EDUCATION

MBA, Management & Project Management
2024 – 2026

Master's Degree, Networks & Telecommunications
2021 – 2023
Recognised by ENIC-NARIC France as comparable to level 7 (Master's level)

CERTIFICATIONS & TRAINING

- Aviatrix Multicloud Network Associate
- Huawei HCIA – Cloud Computing; Huawei HCIA – Routing & Switching
- Cisco Networking Academy – CCNP Enterprise: Core Networking; CCNA: Switching, Routing and Wireless Essentials (SRWE)
- Cisco Networking Academy – Network Defense; Network Security
- In progress: Fortinet FCP
