## PROFILE

Network and security engineer with more than three years of experience across NOC operations and project delivery in a multisite industrial network (Cisco, FortiGate). Intersite SD-WAN migration, backup links and equipment, and core/distribution/access configuration audits. Led a team of six; independent work in auditing, filtering and segmentation. Seeking a role focused on service availability and reducing the attack surface.

## CORE SKILLS

**Networks:** Cisco IOS, LAN/WAN, VLAN, STP/RSTP, HSRP, EtherChannel, OSPF, BGP, BFD, QoS, SD-WAN, Ubiquiti.

**Security:** FortiGate (HA, NAT/VIP, DMZ, IPS), FortiManager, FortiAnalyzer, IPsec/SSL VPN, ACLs, segmentation, firewall policies.

**Monitoring & tools:** Zabbix, PRTG, OpManager, SNMP, GLPI; Ansible, Linux, VMware, GNS3 (labs and projects).

**Delivery:** Network project management, technical team leadership, auditing, remediation plans, architecture documentation.

## PROFESSIONAL EXPERIENCE

### Independent Network & Security Engineer | France | Since Aug 2026

- Audit network and security configurations; identify vulnerabilities and prioritize remediation by severity.
- Review and redesign firewall policies, VPN architectures and segmentation to align access with client needs.
- Assess SD-WAN, cloud connectivity and monitoring solutions; produce architecture diagrams and operating procedures.

### Assistant Network & Security Project Manager (Internship), SGHP | France | Mar-Sep 2026

- Supported the project manager on migration from on-premises infrastructure to the cloud as part of the company’s infrastructure evolution.

### Team Leader & Network Security Project Lead (formerly NOC), Condor Electronics | Algeria | Oct 2023-Sep 2025

- Led four technicians and two engineers, prioritizing incidents and projects across a multisite network.
- Migrated intersite connectivity to Fortinet SD-WAN: VPN tunnels, routing adjustments and centralized link management.
- Deployed Ubiquiti backup links and redundant equipment to reduce the risk of intersite outages.
- Audited VLAN, ACL and OSPF configurations on Cisco and FortiGate equipment.
- Handled Zabbix/PRTG alerts, diagnosed connectivity and routing incidents, and tracked tickets in GLPI.

### Network Engineering Intern, 3K Solutions | Algeria | Feb-Jun 2023

- Configured Cisco equipment (addressing, VLANs, static routing) and tested connectivity before commissioning.

## NETWORK & SECURITY PROJECTS

- **Fortinet multisite SD-WAN:** Four-site hub-and-spoke, two ISP links per site, IPsec IKEv2/AES-256, BGP, OSPF, application steering, FortiManager/FortiAnalyzer. Validated in EVE-NG before migration; sub-second failover measured in the lab.
- **LAN optimization:** Distribution/access redesign, VLAN segmentation, OSPF, ACLs and SNMP monitoring.
- **Azure & AWS hybrid connectivity (lab):** On-premises FortiGate to Azure VPN Gateway and AWS Transit Gateway over IPsec with BGP route exchange; centralized PRTG monitoring.
- **Monitoring & alerting:** Zabbix SNMP polling and thresholds, GLPI ticket creation integration, NOC-style dashboards.

## CERTIFICATIONS & EDUCATION

- **Certifications:** Aviatrix Multicloud Network Associate; Huawei HCIA Routing & Switching; Huawei HCIA Cloud Computing.
- **Cisco Networking Academy training:** CCNP Core Networking; CCNA Switching, Routing & Wireless Essentials; Network Defense; Network Security.
- **MBA2 Management, Project Management:** 2024-2026.
- **Master’s degree in Networks & Telecommunications:** University of Bejaia, 2023. ENIC-NARIC comparability assessment: level 7.
